

JavaScript engine  
single-threaded garbage collection  
parameter vs argument  
weakly typed non-primitive lexical environment  
immutable primitive strongly typed  
named functions asynchronous  
hoisting inheritance state binary digit  
mutable AJAX Static vs dynamic  
data structure bit APIs DOM TIMERS  
synchronous scope blocking function declaration  
anonymous functions call stack  
Last in First out or LIFO  
callbacks vs promises  
block scope callback function  
function expressions  
closure  
encapsulation
